---------------------	---

1. AdPlay

I have priced to remove and dispose of your existing swing frame and to replace it with one basket, one flat and one cradle seat. Separately I have priced to remove the bark and replace this with stone and black wetpour. Please see our figures below.

Remove and dispose of the swing frame and replace - £7389

Option to install with groundworks and black rubber

45m2 of bark to remove and dispose – 100mm thick

Replace with stone and black wetpour £4622

Total for the swing frame and black wetpour - £12,011.00

2. Emroch Landscapes

The quote utilising existing bark is the money we've been given.

3. Streetscapes

Thanks for the email, hope all is well with you.

Apologies for just replying this morning I've been off for a couple of days and back in this morning.

Please see attached an image of the proposed swing (can be custom painted to suit location – standard colour is blue)

Costing for the removal of the existing swing and installation of the attached swing into a bark surfaced area would be £8270 +VAT.

Please note the area of surfacing will need to be 7m x 6m to suit the proposed swing.

If you have any questions or need anything further please let me know.
